---------------------------------------	---------

Systematic nutrition

All our products are developed according to the latest nutritional science.

montanus[®] products provide the essential nutrients your dog needs, with carefully selected ingredients guaranteeing optimum nutrition for your dog.

Feeding tests have consistently shown that **montanus[®]** dog food is very popular with dogs of all breeds and sizes.

In this way, you can make a valuable contribution to the happiness of your four-legged friend. Don't settle for less and rely on the over 75 years of experience of the animal nutrition specialist **Bergophor[®]**!

montanus[®] dog food is a high-quality complete food

All **montanus[®]** dog foods are carefully designed, balanced mixtures and, if the feeding recommendations are followed, guarantee an optimal supply of energy, high quality protein and all essential bulk, trace elements and vitamins.

montanus[®] dog food promises...

- no chemical colourings and flavourings
- constant quality controls
- high digestibility of nutrients
- no use of low-quality vegetable protein extracts (e.g. soya)
- general avoidance of genetically modified raw materials

Give your dog some time to get used to the new food.

Nutritionists always recommend changing a dog's diet „gently“. Switch to the new food gradually (see page 12 - 13). This will help you avoid digestive problems in your pet.

Your dog needs enough fresh drinking water to stay healthy.

In contrast to moist food, which contains 80% moisture, dry food contains only 10%. Therefore, always provide fresh water in a separate bowl. All **montanus[®]** dog foods can be fed dry, moistened and softened.

montanus® nature line

montanus® nature premium complete food guarantees a natural and species-appropriate diet for your dog and provides them with everything they need. This is how we lay the foundation for a long and happy dog life.

All *montanus® nature dog foods* contain natural ingredients of the highest quality and are orientated towards the natural needs of dogs.

Our dog foods have been developed by experts and offer a balanced supply of energy, highly digestible protein, minerals and vital nutrients.

Our dog food is available in sustainable paper bags of 5 kg or 10 kg.

Our brand for naturalness

- without colourings and preservatives
- gluten-free
- without genetic engineering
- without attractants and flavour enhancers
- made in Germany

About US

All *montanus[®] nature feeds* are cold-pressed.

High temperatures are not used during the production of the feed in this gentle manufacturing process. This means that the native nutrients are almost completely preserved.

Proteins, oils, vegetable components and vitamins retain their original properties and value during production.

Cold-pressed pellets

- encourage dogs to chew thoroughly
 - this promotes the cleaning of the teeth and reduces bad breath
- do not swell in the stomach
 - the food volume remains the same and there is no feeling of fullness in the stomach
- can also be chewed by small dogs
- have a higher density
- do not grease
- can be fed dry, moistened and softened

*extruded
dog food*

*cold-pressed
dog food*

Muscle meat instead of „protein“

- in our **montanus® nature dog foods** we do not use any animal by-products such as fur, feathers, horn and beaks, but pure meat
- the muscle meat offers optimum digestibility and particularly high tolerability

One type of meat

- only one source of animal meat is used in the recipes
- for example, we use chicken meat instead of poultry protein
- one type of meat is perfect for sensitive dogs and dogs that are prone to allergies

Dried lamb, dried chicken, whole egg powder

High-quality and optimally digestible protein sources, without animal by-products such as feathers or horn

Potato flakes, wholegrain rice, millet, wholegrain maize

Easily digestible and gluten-free carbohydrate sources

Vegetables, fruit and herbs

Vitamins, fibre and secondary plant substances

Turmeric antioxidant, anti-inflammatory, aids digestive

Seaweed

Nutrient-rich and antioxidant

Fish oil, hemp oil and rapeseed oil

valuable fatty acids such as omega-3 and omega-6 fatty acids

Yucca Schidigera

reduces unpleasant odours in faeces

Carefully selected ingredients

Moor

Digestive and detoxifying

Egg yolk flour

High-quality source of nutrients

Mussel meat extract

supports joint health

Beet pulp

Prebiotic fibre source

Milk thistle seeds

support the natural liver function

Silica

strengthens the connective tissue

Linseed

provides essential omega-3 and omega-6 fatty acids and aids digestion

Fennel seeds

Aids digestive

Wild bone meal

natural source of calcium and phosphorus

Gluten-free

Our **montanus[®] nature dog foods** are gluten-free to avoid possible intolerances with itching, flatulence or diarrhoea.

Without added colourings and flavourings

It is free from colour additives, attractants and preservatives and contains no genetically modified ingredients for a species-appropriate and natural diet for your pet.

Cold-pressed

Cold pressing is a particularly gentle production technique that excludes high temperatures and almost completely preserves the native nutrients of the feed components.

Turmeric

Turmeric has antioxidant, anti-inflammatory and positive effects on digestion and liver function.

Vegetables, fruit and herbs

Vegetables, fruit and herbs are rich in natural vital substances and active ingredients to support and stabilise the metabolism.

High-quality protein

High-quality protein from one type of meat guarantees a pure, defined protein quality, is highly digestible and is also highly tolerable by sensitive dogs.

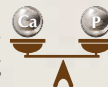

Mussel meat extract extract or green-lipped mussel meat meal

To maintain healthy joints for more agility and vitality.

Optimum skeletal development

The harmonious calcium:phosphorus ratio and the addition of vitamin D₃ promote the formation of strong teeth and stable bones.

Taurine and L-carnitine

Taurine and L-carnitine support heart function and supply the muscles with energy.

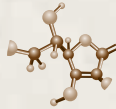

Reduced in energy and protein

The energy and protein-reduced recipe relieves the metabolism and supports the maintenance of optimum weight.

Promote vitality and well-being

Vitamins prevent deficiency symptoms and promote vitality and well-being in dogs.

Support the immune system

Vitamins stimulate the metabolism and support the immune system of your four-legged companion.

Thick, shiny coat

Trace elements, essential fatty acids and vitamins for a thick and shiny coat.

Supple skin

An increased intake of methionine, vitamins, zinc and copper is essential for healthy skin.

Strong claws

Important vital substances and biotin to strengthen pads and claws.

Stabilises the intestinal flora

Psyllium husks and probiotics to protect the intestinal mucosa and improve faecal consistency.

Supports the digestive system

Pro- and prebiotics to support healthy intestinal flora.

Increases well-being

A general improvement in the intestinal flora, which can lead to better digestion, also strengthens general well-being and immune defence.

supports joints and bones

Bioactive collagen and valuable anabolic substances (glycosaminoglycans) from green-lipped mussel meat meal and omega-3 fatty acids support the health of the entire musculoskeletal system.

boosts the immune system

Omega-3 fatty acids strengthen the immune system.

Reasons for a change of diet:

- age-related change of diet
 - Puppy and junior food: from the 3rd week softened as supplementary food
 - Adult food: from 12 months
 - Senior food: from 7 to 10 years of age, depending on the breed
- the desire for better quality food
- diseases, allergies and intolerances
- overweight or underweight
- refusal of food
- personal preferences of the owner
- availability of the products
- cost reasons

Slow and steady wins the race:

A change of diet should only be made slowly in order to gently accustom the dog and its intestinal flora to the new food.

Changing the food too quickly can lead to diarrhoea, flatulence, itching and vomiting.

The unfamiliar taste and smell can also unsettle your dog and lead to a refusal to eat.

The right mixture goes a long way:

The new food should first be mixed with the old food. At the beginning, only a little of the old food should be exchanged for the new food. You can then increase the amount every two days. For sensitive dogs, you can also extend the change of food to two to three weeks.

day 1 & 2

day 5 & 6

day 3 & 4

Playful changeover:

In addition to gradually changing the meal, you can also offer the new food in a playful way. Dry food, for example, is a good treat. When switching to wet food, you can use a lick mat to familiarise your dog with the new food.

Picky eater?

Some dogs refuse new food at the beginning. They first have to get used to the new flavour, smell and consistency of the food. For picky dogs, the changeover process should be extended to two weeks. Only a few treats should be offered alongside the meals. To make the food more palatable to the dog, you can mix something particularly tasty into the food at the beginning. Boiled chicken, salmon oil or broth made from boiled bones are good for this.

from the 7. day

Assessment of the feeding success:

- Consistent weight in adult dogs
- Breed-specific normal weight
- defecation once or twice a day
- firm faeces consistency
- shiny and healthy coat without dandruff
- lively behaviour, in keeping with its character

montanus[®] nature junior is a premium complete nutrition for puppies and young dogs of all breeds up to the age of 12 months. It can be fed softened from the 3rd week of life.

The foundations for a long and happy dog's life are already laid in early puppyhood.

When rearing puppies and young dogs, it is not maximum growth that is important, but healthy growth.

montanus[®] nature junior is orientated towards the needs of puppies and young dogs and enables them to grow up naturally and sustainably.

Whole, broken down and gluten-free carbohydrates from wholegrain rice and wholegrain maize provide easily digestible energy and important fibre to support physiological digestion.

Hemp oil and fish oil contain essential omega-3 and omega-6 fatty acids in an ideal ratio for the metabolism.

Art. No.: **0583**

Packaging: 5 kg / 10 kg bag

Complete food for puppies and young dogs

- premium quality
- pure chicken meat
- highly digestible and palatable
- balanced calcium:phosphorus ratio for optimum skeletal development
- balanced energy and protein content for slow, natural growth
- vitamin D₃ strengthens the bones and promotes the development of strong teeth
- suitable for puppies and young dogs of all breeds

ideal for PUPPIES AND YOUNG DOGS

up to 12
months

montanus[®] nature Huhn & Kartoffel is a premium product with pure chicken meat and no added grain for adult dogs of all breeds.

Wholesome, broken down and gluten-free carbohydrates from potato flakes and peas provide easily digestible energy, protein and important fibre to support physiological digestion.

Hemp oil, fish oil and linseed contain essential omega-3 and omega-6 fatty acids in an optimal ratio for the metabolism.

Taurine and L-carnitine are essential for the cardiovascular system and the energy metabolism of dogs. They supply the muscles with energy and have a positive effect on heart health.

montanus[®] nature Huhn & Kartoffel is also suitable for active dogs. Simply adjust the daily feeding to the dog's activity level.

also suitable for ACTIVE DOGS

montanus[®] nature Lamm & Reis is a premium product with pure lamb meat. It is also ideal for sensitive dogs or dogs that are prone to allergies. **montanus[®] nature Lamm & Reis** can also be fed to young dogs and senior dogs.

Wholesome, broken down and gluten-free carbohydrates from brown wholemeal rice, peas and millet provide easily digestible energy, protein and important fibre to support physiological digestion.

High-quality protein from pure lamb, whole egg powder and mussel meat extract guarantees a pure, defined protein quality, is highly digestible and also very well tolerated by sensitive dogs.

Hemp oil and linseed contain essential omega-3 and omega-6 fatty acids in an optimum ratio for the metabolism.

Mussel meat and silica support natural joint function.

ideal for dogs with SENSIBLE DIGESTION

ADULT

montanus[®] nature senior is a premium complete food for older dogs aged 7 years and over. The energy and protein-reduced recipe relieves the metabolism and supports the maintenance of optimum weight.

High-quality protein from chicken guarantees pure, defined protein quality, is highly digestible and is also suitable for sensitive dogs.

The senior age starts at 7 years for larger dogs, while smaller breeds are only considered senior at 10 years.

As dogs get older, their metabolism and digestive tract change - their dental health and sense of taste decrease, the production of stomach acid production decreases and food digestion is limited. Even the microbiome in the gut is subject to age-related changes.

For these reasons, **montanus[®] nature senior** is adapted to the special needs of older dogs.

In some dogs, vitamin absorption may be lower in old age. To provide older or sick dogs with additional vitamins, we recommend **montanus[®] nature Multi-Vits** (Art. No.: 0578; page 32).

Art. No.: **0584**

Packaging: 10 kg bag

Tips for feeding seniors:

We recommend 3 meals a day for senior dogs. If your dog has dental problems, pour water over **montanus[®] nature senior** and leave to soak - this makes it easier to eat.

Feeding recommendation

ideal for OLDER DOGS

**from 7
years**

Our standard brand **montanus®** stands for a species-appropriate basic diet for your pet.

The crunchy kibbles are particularly tasty and provide all the nutrients your dog needs.

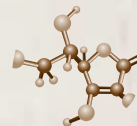

With carefully selected ingredients and an affordable price, you can offer your dog a balanced diet.

All **montanus®** dog foods can be fed dry, moistened or softened.

Our **montanus®** dog food is available in 10 kg and 20 kg sizes.

Vitamins and trace elements

Thanks to the addition of all essential vitamins and trace elements, our dog food is suitable as a complete food.

Very good palatability

Our complete food is very palatable and easily digestible.

Without added wheat

To avoid possible intolerances with itching, flatulence or diarrhoea, our **montanus® adult** contains no wheat.

Without added colourings and flavourings

It is free from colour additives, flavourings and genetically modified ingredients for a species-appropriate and natural diet for your pet.

montanus® adult is a balanced complete food for adult dogs of all breeds from the age of 12 months.

The recipe is based on the latest scientific findings and supply recommendations of the European Pet Food Industry FEDIAF.

It is very tasty and easily digestible. Thanks to the addition of all essential vitamins and trace elements, it is suitable as a complete feed.

Linseed oil and the addition of biotin, zinc and copper support the skin and coat metabolism. Thus **montanus® adult** promotes the resistance and suppleness of the skin and ensures a shiny and thick coat.

montanus® adult is also suitable for active dogs.

The balanced calcium:phosphorus ratio and the vitamin D₃ content support the formation of strong teeth and stable bones.

Vitamin E and selenium as metabolically active antioxidants help to protect the body's cells.

Feeding recommendation

weight of the dog	daily feed ration
2 - 5 kg	55 - 110 g
6 - 10 kg	110 - 185 g
11 - 20 kg	185 - 310 g
21 - 30 kg	310 - 420 g
31 - 50 kg	420 - 615 g
51 - 70 kg	615 - 795 g

Art. No.: **0585**

Container: 10 kg bag

also suitable for ACTIVE DOGS

montanus® basic is a balanced complete food for adult dogs of all breeds.

It is very tasty and easily digestible. Thanks to the addition of all essential vitamins and trace elements, it is suitable as a complete complete food.

The addition of biotin, zinc and copper supports the skin and coat metabolism.

Thus *montanus® basic* promotes the resistance and suppleness of the skin and ensures a shiny and thick coat.

Vitamin E and selenium as metabolically active antioxidants help to protect the body's cells.

Feeding recommendation

Art. No.: **0587**

Container: 20 kg bag

ideal for ADULT DOGS

montanus® primary is a balanced complete food for adult dogs of all breeds.

Thanks to the addition of all essential vitamins and trace elements, it is suitable as a complete complete food.

The crunchy kibble is particularly tasty and provides all the nutrients your dog needs.

Vitamin E and selenium as metabolically active antioxidants help to protect the body's cells.

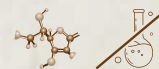

Feeding recommendation

<i>weight of the dog</i>	<i>daily feed ration</i>
2 - 5 kg	60 - 100 g
6 - 10 kg	100 - 165 g
11 - 20 kg	165 - 280 g
21 - 30 kg	280 - 380 g
31 - 50 kg	380 - 555 g
51 - 70 kg	555 - 715 g

Art. No.: **0504**

Container: 20 kg bag

ideal for ADULT DOGS

montanus[®] nature Puppy-Milk is a high-quality milk powder for rearing newborn puppies.

montanus[®] nature Puppy-Milk is optimally soluble and contains high-quality ingredients and all the necessary minerals, trace elements and vitamins.

The skimmed milk and whey powder and the five essential amino acids lysine, methionine, threonine, tryptophan and valine guarantee ideal protein quality for optimum growth and healthy development of puppies. The tasteless and odourless combination of acids reduces the number of harmful germs in the digestive tract and promotes the puppies' natural intestinal flora.

Due to its high tolerability and balanced nutrient content, it can be used as a complete milk substitute for motherless rearing.

montanus[®] nature Puppy-Milk is also ideal for supplementary feeding if the bitch is lacking milk or for weak puppies.

Art. No.: **0232**

Container: 2,5 kg bucket

Feeding recommendation

Feeding schedule for motherless rearing (milk quantity per meal):

body weight of the adult dog	1. + 2. day of life	3. - 7. day of life	8. - 14. day of life	15. day of life until weaning
meals per day	8	6	5	4
≤ 5 kg	5 - 10 ml	15 - 20 ml	20 - 25 ml	30 - 35 ml
5 - 15 kg	10 - 15 ml	20 - 25 ml	30 - 35 ml	50 - 60 ml
15 - 25 kg	15 - 20 ml	30 - 35 ml	40 - 50 ml	60 - 70 ml
25 - 50 kg	20 - 25 ml	40 - 50 ml	60 - 70 ml	100 - 120 ml
> 50 kg	25 - 30 ml	50 - 60 ml	70 - 80 ml	120 - 150 ml

The body weight of the adult dog is taken into account.

Attention:

Immediately after birth, the puppies must receive colostrum from their mother.

suitable for rearing NEWBORN PUPPIES

montanus[®] nature Multi-Vits are multivitamin tablets for dogs.

The 13 essential vitamins prevent deficiency symptoms and promote the vitality and well-being of dogs. The vitamins stimulate the metabolism and support the immune system of our four-legged friends.

montanus[®] nature Multi-Vits not only contain B vitamins, but also vitamins A, E, C and K. The L-carnitine they contain also promotes energy metabolism and supports heart health.

montanus[®] nature Multi-Vits are suitable for dogs with an increased vitamin requirement:

- dogs in stressful situations, such as travelling or change of coat
- pregnant or nursing bitches
- growing dogs
- seniors
- dogs that are susceptible to illness or are ill
- with a low vitamin diet

Art. No.: **0578**

Container: 200 g bag

Feeding recommendation

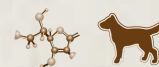

<i>weight of the dog</i>	<i>number of tablets</i>
5 kg	1 tablet
10 kg	2 tablets
20 kg	3 - 4 tablets
30 kg	4 - 5 tablets
40 kg	5 - 6 tablets
50 kg	6 - 7 tablets
60 kg	7 - 8 tablets
80 kg	9 - 10 tablets

Mix into the daily feed (whole or ground up) or feed by hand.

We recommend a feeding period of 4 to 6 weeks. If the diet is otherwise low in vitamins, permanent feeding is also possible.

suitable for all dog breeds from PUPPY TO SENIOR

montanus[®] nature Fluffy-Coat is a skin and coat powder for dogs of all breeds and ages to support skin and hair metabolism.

For support during the shedding period with methionine, biotin, vitamin E and zinc for a thick and shiny coat, supple skin and strong claws.

Due to their constant renewal, the skin and coat are dependent on a sufficient supply of biotin, zinc, methionine and copper.

Studies have shown that the temporary supplementation of zinc, vitamin A, biotin and vitamin E has positive effects on hair growth and skin condition (Beynen, 2023; Meyer and Zentek, 2022; Rückert, 2020).

montanus[®] nature Fluffy-Coat provides the skin and coat with these essential nutrients and compensates for deficiencies in the feed.

montanus[®] nature Fluffy-Coat for dogs with:

- severe itching
- dry, flaky skin
- dull coat
- severe hair loss
- brittle claws

Art. No.: **0579**

Container: 100 g / 300 g tin

In particularly stressful situations for skin and coat:

Coat change: begins a few weeks before we notice it

Winter months: with the sudden change from warm to cold air, wetness, ice and road salt

Parasite infestation: skin irritation, wounds and inflammation

Dirt and environmental toxins: stress the skin's metabolism

Feeding recommendation

weight of the dog	recommended number of measuring spoons
5 - 10 kg	1 measuring spoon
10 - 20 kg	2 measuring spoon
20 - 30 kg	3 measuring spoon
30 - 40 kg	4 measuring spoon
40 - 60 kg	6 measuring spoon
60 - 80 kg	8 measuring spoon

One whole measuring spoon corresponds to approximately 2 g.

We recommend a feeding period of 4 to 6 weeks. Simply add the powder to the daily food (whether wet or dry food).

When feeding dry food, moisten the whole thing slightly and mix.

suitable for support during the CHANGE OF COAT

montanus[®] nature Belly-Care is an intestinal powder to support the intestinal flora of dogs.

Around 70 % to 80 % of your dog's immune system is located in its intestines. If the intestinal mucosa is damaged and the natural intestinal flora is disturbed, this can pro-responses and lead to digestive disorders. An imbalance in the intestinal flora has a negative effect on the digestion and well-being of dogs.

montanus[®] nature Belly-Care contains carefully selected ingredients with valuable dietary fibres, detoxifying humic acids and diatomaceous earth as well as high-dose probiotics (*Bacillus velezensis*) to stabilise the intestinal flora.

In particularly stressful situations for the digestive tract:

- digestive problems (flatulence, diarrhoea, eating grass and faeces)
- feeding errors (abrupt feed changes, allergies)
- parasite infestation and infections (e.g. with *Giardia*)
- stress and anxiety (e.g. travelling, visits to the vet)
- after medication (antibiotics and deworming treatments)

Also prophylactically as intestinal renewal and to support a change in diet.

Art. No.: **0565**

Container: 100 g / 350 g tin

Feeding recommendation

weight of the dog	recommended number of measuring spoons
5 - 10 kg	1 measuring spoon
10 - 20 kg	2 measuring spoon
20 - 30 kg	3 measuring spoon
30 - 40 kg	4 measuring spoon
40 - 60 kg	6 measuring spoon
60 - 80 kg	8 measuring spoon

One whole measuring spoon corresponds to approximately 2 g.

montanus[®] nature Belly-Care is suitable for dogs of all breeds and ages. We recommend a feeding period of 4 to 6 weeks.

Due to the natural and healing components, **montanus[®] nature Belly-Care** can also be fed permanently.

Simply add the powder to the daily feed (whether wet or dry food). When feeding dry food, moisten the mixture slightly moisten and mix.

suitable for GUT RESTORATION

montanus[®] nature Flexi-Move is a powder to support joint health in dogs.

The powder stimulates the formation of cartilage and bone cells and supports the reconstruction of joint cartilage.

montanus[®] nature Flexi-Move supplies your dog's musculoskeletal system with valuable anabolic substances such as bioactive collagen and glycosaminoglycans from green-lipped mussel meat meal. For old dogs, it supports the maintenance of joint cartilage, increases mobility and promotes quality of life.

montanus[®] nature Flexi-Move maintains joint health.

montanus[®] nature Flexi-Move for dogs with:

- stiff or lame gait
- less joy of movement
- problems getting down and up
- difficulties climbing stairs, jumping and running
- licking of the joints
- sudden flinching during certain movements
- swelling and cracking of the joints

Art. No.: **0974**

Container: 400 g tin

Feeding recommendation

Weight of the dog	Recommended number of teaspoons
5 - 10 kg	1 Teaspoon
10 - 20 kg	2 Teaspoon
20 - 30 kg	3 Teaspoon
30 - 40 kg	4 Teaspoon
40 - 60 kg	6 Teaspoon
60 - 80 kg	7,5 Teaspoon

A whole teaspoon corresponds to approximately 2 g. Daily 2 g per 10 kg body weight, maximum 15 g. Simply add the powder to the daily feed (whether wet or dry food). When feeding dry food, moisten and mix a little. We recommend a feeding period of 6 weeks. Permanent supplementary feeding is also possible.

montanus[®] nature Flexi-Move is suitable for dogs of all breeds at any age and in any situation:

Older dogs: supports the maintenance of cartilage and provides more mobility, flexibility and improved well-being

Active dogs: optimises the natural function and resilience of the joints and bones and ensures greater performance

Puppies and young dogs: improves the supply of joint cartilage and bones and thus promotes healthy growth.

to support the MUSCULOSKELETAL SYSTEM

montanus[®] nature Lachsöl is a premium oil for dogs and cats and is rich in valuable omega-3 fatty acids.

Polyunsaturated fatty acids (omega fatty acids, EPA and DPA) cannot be produced by dogs and cats themselves. They must therefore be supplied from the outside through food, as they are essential for a smooth metabolism.

montanus[®] nature Lachsöl can be added to any food, whether dry, wet food or BARF rations. The essential, unsaturated fatty acids nourish the skin and coat of dogs and cats and promote the health of the musculoskeletal and the cardiovascular system. The immune system is positively influenced and possible inflammations are inhibited.

montanus[®] nature Lachsöl supports the entire metabolism of dogs and cats and promotes general health thanks to its high content of omega-3 fatty acids.

- 100 % pure salmon oil without additives
- in food quality
- rich in essential omega-3 fatty acids

Art. No.: **0973**

Container: 250 ml bottle

Feeding recommendation per animal and day

Dogs: 2 ml per 10 kg body weight (maximum 10 ml)

Cats: 1 ml (correspondingly less for kittens)

Simply add to the daily food and mix well.

As a high-quality straight feeding stuff in food quality, salmon oil enriches your pet's meal and promotes its general health.

Omega-3 fatty acids:

- care for the skin and ensure a shiny coat
- promote joint and bone health
- strengthen the immune system and metabolism
- support the cardiovascular system
- maintain and improve brain function
- have an anti-inflammatory effect

Protect from light, do not store above room temperature. After opening store in the refrigerator and consume within 12 weeks.

with *ESSENTIAL* omega-3 fatty acids

montanus[®] nature Kauknochen made from pressed cowhide offer long-lasting chewing fun for small and large dogs.

Chewing strengthens the teeth and supports the dental health of dogs in a natural way. It helps to clean the teeth and reduce dental plaque.

With *montanus[®] nature Kauknochen*, dogs can fulfil their natural need to chew. Chewing helps to relieve boredom and reduce stress.

The *montanus[®] nature Kauknochen* is ideal for distraction and occupation thanks to its high resistance and the resulting long chewing time. For example, it is perfect for keeping dogs occupied when they are alone or to make a long wait (e.g. during a visit to a restaurant) easier for them.

Feeding recommendation

Tip: Some dogs like their chew bones to be slightly softened. You can simply put the bones in water for a few minutes. For this reason, some dogs also like to bury their bones so that they absorb moisture in the soil.

montanus[®] nature Kauknochen

- long chewing fun
- occupation and stress reduction
- low in fat
- made from 100 % cowhide
- strengthens teeth and cares for gums
- free from colourings, flavourings and preservatives

Art. No.: 0773

Container: 2 x 90 g

for LONG-LASTING chewing fun

montanus® Futtertonne (Feed container)

Ideal for storing pet food. The container offers reliable protection thanks to the airtight lid.

The large pouring opening and the ergonomic, comfortable handle make it easy to fill the container. The food can be removed easily.

The feed bin has castors for the necessary stability and easy transport. This means that the bin can be easily transported even when fully loaded, putting an end to heavy lugging.

With dimensions of 41 cm x 37 cm x 50 cm (L x W x H) and a filling capacity of 38 litres, a whole bag of dog food (10 kg) fits comfortably in the food bin. So you no longer have any opened bags standing around at home.

The food-safe material (plastic/plastic (PP) - BPA free) and the airtight lid provide the ideal storage conditions and also protect against sunlight.

The scope of delivery also includes a scoop with which you can remove and portion the food.

Art. No.: **6217**

Container: 1 piece

montanus® *Hundefressnapf (dog food bowl)*

Food bowl made of non-slip, robust stainless steel - elegant, functional and reliable.

Thanks to its high-quality stainless steel finish, this food bowl impresses with its durability and ease of cleaning. Thanks to its smooth surface, the material is resistant to corrosion.

Our **montanus®** *Hundefressnapf* offers a healthy and sustainable alternative to plastic bowls.

The wide rubber ring on the underside ensures exceptional stability. Whether tiles, laminate or other smooth floors, the bowl stays firmly in place without slipping. This means less stress and mess during mealtimes.

The large stainless steel bowl with a capacity of around 1.5 litres is ideal for large dogs and also provides sufficient water for smaller dogs and cats.

Art. No. **0847**

Container: 1 piece

Our standard brand **montanus**® stands for a species-appropriate basic diet for your pet.

The crunchy kibbles are particularly tasty and provide all the nutrients your cat needs.

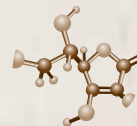

With carefully selected ingredients and an affordable price, you can offer your cat a balanced diet.

All **montanus**® cat foods can be fed dry, moistened or softened.

Our **montanus**® cat food is available in 2 kg and 10 kg sizes.

Vitamins and trace elements

Thanks to the addition of all essential vitamins and trace elements, our cat food is suitable as a complete food.

With salmon oil

Salmon oil provides your cat with essential omega-3 and omega-6 fatty acids and thus promotes the health of the cardiovascular system. Salmon oil strengthens joints and bones and increases palatability.

Very good palatability

Our complete food is very palatable and easily digestible.

Without added colourings and flavourings

montanus® cats sensible is free from colour additives, flavourings and genetically modified ingredients for a species-appropriate and natural diet for your pet.

Reasons for a change of a cats diet:

- age-related change of feed
- the desire for better feed quality
- diseases, allergies and intolerances
- overweight and underweight
- refusal of food
- personal preferences of the owner
- availability of the products
- cost reasons

How to make the change of food work:

Cats are creatures of habit. It is in their nature to only eat what they know.

This protects them from unknown dangers such as poisonous plants and animals. As cats have very little variety in nature and their digestion is highly specialised in the food they are used to, a sudden change of the diet can lead to digestive problems and refusal to eat.

You should therefore allow at least a week for a change of diet and gradually replace the old food with the new one in small steps.

To do this, mix the two feeds together as follows:

Day 1 - 2	$\frac{3}{4}$ old feed + $\frac{1}{4}$ new feed
Day 3 - 4	$\frac{1}{2}$ old feed + $\frac{1}{2}$ new feed
Day 5 - 6	$\frac{1}{4}$ old feed + $\frac{3}{4}$ new feed
From day 7	new feed

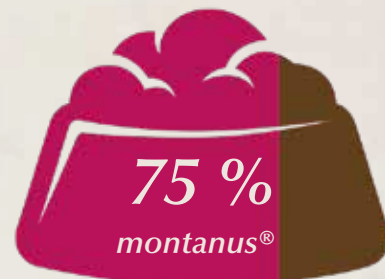

For sensitive cats, you can extend the change of diet to two to three weeks and mix in less of the new food at the beginning.

If the cat does not accept the new food, it has proven to be a good idea to mix special treats

Day 1 & 2

Day 5 & 6

Day 3 & 4

into the food. Salmon oil, tuna juice, meat broth, grated Parmesan cheese or fish are suitable for this.

These delicacies enrich the flavour and increase the cat's acceptance of the food.

Patience is the key to a successful food change. Give your cat the time it needs to get used to the new food.

Assessment of the feeding success:

- consistent weight in adult cats
- breed-specific normal weight
- shiny and healthy coat without dandruff
- lively behaviour, according to character

from the 7. day

montanus® cats sensible is a balanced complete food for adult cats of all breeds and is also suitable for sensitive cats.

The balanced recipe is based on the latest scientific findings and supply recommendations of the European Pet Food Industry (FE-DIAF).

Thanks to the addition of all essential vitamins and trace elements, it is suitable as a complete food.

It is very palatable and easily digestible.

The balanced calcium:phosphorus ratio and the addition of vitamin D₃ support the formation of strong teeth and stable bones.

Vitamin E and selenium as metabolically active antioxidants help to protect the body's cells.

Art. No.: **0586**

Container: 2 kg bag

Feeding recommendation

weight of the cat	daily feed ration
2 kg	35 - 40 g
3 kg	50 - 55 g
4 kg	60 - 65 g
5 kg	70 - 75 g
6 kg	80 - 85 g
7 kg	90 - 95 g

Fish oil and the addition of biotin, zinc and copper support the skin and coat metabolism. In this way, **montanus® cats sensible** promotes the resilience and suppleness of the skin and ensures a shiny and thick coat.

The included salmon oil provides your cat with essential omega-3 and omega-6 fatty acids and thus promotes the health of the cardiovascular system. Salmon oil strengthens joints and bones and increases palatability.

ideal for SENSITIVE CATS

montanus® cats is a balanced complete food for adult cats of all breeds.

Thanks to the addition of all essential vitamins and trace elements, it is suitable as a complete food.

The varied kibble shape promotes acceptance and cares for the tooth surface when chewed. Intestinal fibre stimulates digestion and optimises the consistency of faeces.

The balanced calcium:phosphorus ratio and vitamin D₃ support the formation of strong teeth and stable bones.

The body cells are protected by vitamin E and selenium as metabolically active antioxidants.

Shiny coat and supple skin thanks to the addition of highly effective vitamin A and zinc.

Feeding recommendation

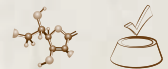

weight of the cat	daily feed ration
2 kg	45 g
3 kg	60 g
4 kg	70 g
5 kg	80 g
6 kg	95 g
7 kg	105 g
8 kg	115 g
9 kg	120 g
10 kg	130 g

Art. No.: **0468**

Container: 10 kg bag
