Without preservatives and colourings

Grain- and starch-free

Without added sugar

GMO-free

Certified by QAL GmbH in 2022

A pro- and prebiotic feed supplement to stabilise the intestinal flora and to support fecal water syndrome. A high concentration of live yeast promotes the natural intestinal flora.

Humic acids and valuable mucilage nourish the intestinal mucosa. Specially activated clay minerals have detoxifying properties and protect the intestinal mucous membranes.

Pectin- and fibre-rich components stimulate the absorption of free faecal water in the intestine and nourish the natural intestinal microbes.

- probiotic: with live yeast to promote the natural intestinal flora
- rich in pectin and fibre
- detoxifying thanks to bentonite and sepiolite

Trading unit: **3 kg Bucket**

montanus® *nature Bronchi-Protect*

item no. 0231

A special combination of effective additives. These have an antioxidant, anti-inflammatory and soothing effect on the respiratory tract. They also promote the immune defence and strengthen the mucous membranes of the respiratory tract.

They can also be used as a precautionary measure, for example in flu weather, bad stable air, allergies and high dust pollution.

ATTENTION!

Observe the doping regulations. The following applies a grace period of 2 days / 48 hours.

- rich in antioxidants, polyphenols and secondary plant substances
- with vitamins and organically bound zinc and selenium
- promotes respiratory health

Trading unit: **4 kg Bucket**

montanus® *nature Amino-Forte*

item no. 0228

To promote muscle development and the maintenance of the musculature.

montanus® nature Amino-Forte contains the pure amino acids threonine, methionine and lysine, which are 100 % digestible in the small intestine.

Vitamin B₁₂ supports muscle metabolism and is essential for horses' performance.

- highly pure amino acids
- to compensate for low-protein rations
- for horses with particularly high requirements

Trading unit: **800 g Can**

A supplementary feed for horses and ponies to reduce stress reactions and to calm them down.

With a synergistic combination of four different magnesium compounds, hops, tryptophan and vitamin B₁₂, it promotes calmness in horses.

ATTENTION!

Please observe the doping regulations.

A waiting period of 2 days / 48 hours applies.

- to reduce stress reactions
- for strong nerves and calmness
- promotes the performance

Trading unit: **800 g Can**

montanus® *nature Biotin-Konzentrat*

item no. 0476

To promote hoof and skin metabolism and to support the change of coat.

It supplies the hoof horn, skin and coat with the essential nutrients biotin, zinc, copper and methionine.

montanus® nature Biotin-Konzentrat is suitable for horses of all ages and breeds.

- strengthens the hoof horn
- promotes the skin metabolism
- supports the change of coat

Trading unit: **1 kg Can**

montanus® *nature Joint-Mobility*

item no. 0975

Promotes the health and resistance of joints, tendons and ligaments. The powder provides more flexibility, motivation and a higher quality of life. It optimises the natural function and resilience of the musculoskeletal system.

- supports joint health and strengthens tendons and ligaments
- for more mobility, performance and quality of life
- with valuable anabolic substances and antioxidants

Trading unit: **500 g Can**

montanus® *nature Lachsöl*

item no. 0973

The essential omega-3 fatty acids it contains care for the skin and coat of horses, promote the health of the musculoskeletal system and the cardiovascular system. The immune system is stimulated and possible inflammations inhibited.

- supports the entire metabolism
- promotes general health
- 100 % pure salmon oil without additives
- food quality
- rich in essential omega-3 fatty acids

Trading unit: **250 ml Bottle**

A vitaminised mineral feed for horses and ponies of all breeds. The optimally dosed minerals, trace elements and vitamins cover the horses' requirements and compensate for deficiencies in the basic ration.

- with organically bound zinc and selenium
- counteracts food waste
- with a mixture of garlic and cinnamon
- to support the defence against flies

Trading unit: **5 kg Bucket / 25 kg Bag**

montanus® nature Leckmasse

item no. 0434

A vitaminised mineral feed for instinctive and free coverage of requirements. Its uncomplicated administration and weather resistance make it ideal for horses on pasture or in open stables.

- provides the horse with all essential minerals, trace elements and vitamins
- with a mixture of garlic and cinnamon to support the defence against flies
- is weatherproof, does not break or crumble

Trading unit: **10 kg Bowl, 25 kg Bucket**

KULMIN® SALZLECKSTEIN OLB

item no. 6026

Horses often suffer from a sodium deficiency. The requirement depends heavily on sweat production and can increase dramatically during exercise. As a rule, salt and minerals are absorbed spontaneously, which is why free-range lickstones are ideal for providing a sufficient supply. A salt lick should always be offered in addition to the mineral feed.

- with added iodine
- for free intake

KULMIN® SALZLECKSTEIN OLB can be used in organic production in accordance with Regulations (EU) No. 2018/848 and 2021/1165. Certified by: DE-ÖKO-039. Listed in the FiBL-list of inputs for organic farming in Germany.

Trading unit: **10 kg Stone**

KULMIN® MINERALLECKSTEIN OLB

item no. 0326

Salt lick, which in addition to sodium chloride also contains the trace elements manganese, zinc, iron, iodine and selenium.

- with trace elements
- for free intake

KULMIN® MINERALLECKSTEIN OLB can be used in organic production in accordance with Regulations (EU) No. 2018/848 and 2021/1165. Certified by: DE-ÖKO-039. Listed in the FiBL-list of inputs for organic farming in Germany.

Trading unit: **10 kg Stone**

The fibre-rich and tasty mash stimulates digestion with its natural and balanced recipe and promotes the natural intestinal flora of horses with its prebiotic ingredients. Various sources of crude fibre provide both soluble and insoluble fibre and protective mucilage.

It can be mixed with both warm and cold water and fed after a soaking time of 10 minutes.

Infuse the mash with 2 to 3 times the amount of water.

- rich in fibre, prebiotic, promotes digestibility
- quick and easy to prepare
- without artificial additives
- 100 % natural

Trading unit: **5 kg Bucket, 25 kg Bag**

montanus® *nature Pferdekraft Pro*

item no. 0571

A tasty, oat-free concentrate feed to boost the energy content of the ration. The pellets contain easily utilisable energy from broken down grain and also food-grade bakery and pasta products.

Highly fermentable, fibre-rich ingredients, such as apple pomace, stimulate digestion.

- highly available energy
- vitaminised and mineralised
- counteracts food waste

Trading unit: **25 kg Bag**

montanus® *nature Pferdemüsli*

item no. 0431

Tasty and digestion-supporting. The natural herbs parsley, rosemary, coriander, peppermint, basil, nettle and garlic have positive effects on the metabolism and digestive system thanks to their valuable ingredients.

The low-dust muesli contains essential minerals and vitamins that cover the horses' requirements.

- with minerals, vitamins and trace elements
- contains valuable natural herbs
- tasty and low in dust

Trading unit: **20 kg Bag**

A highly digestible supplementary feed in pellet form for foals and broodmares. **montanus® nature Fohlenkraft** can be offered to foals from 4 to 6 weeks of age as a supplementary feed together with hay. Thanks to the free amino acids and high-quality protein components, it covers the requirements of foals, young horses and mares during pregnancy and lactation.

- with pure amino acids and B vitamins
- ideal Ca:P ratio and vitamin D₃ for stable bones and joints
- counteracts food waste

Trading unit: **25 kg Bag**

montanus® *nature Foal-Milk*

item no. 0574

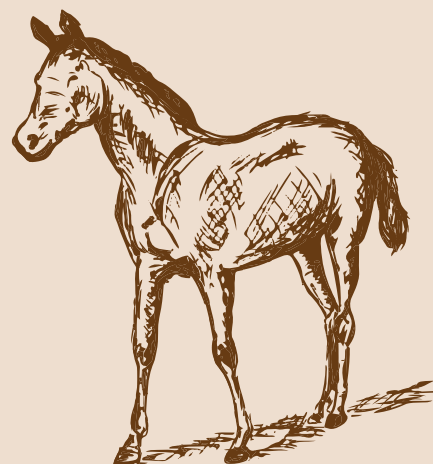

Can completely replace mare's milk. The wholesome formula is based on the nutrient content of natural mother's milk.

The high-quality skimmed milk and whey powder as well as the amino acids guarantee ideal protein quality.

- with all the necessary nutrients
- optimally digestible
- very soluble
- complete milk substitute for motherless rearing
- upgrading the ration of weanling foals

Trading unit: **5 kg Bucket**

The natural and energy-rich components promote the horses' vitality and performance and give their coat shine.

BERGIN® LEINEX Plus is ideal for sports and breeding horses, as well as for horses with poor constitution.

The valuable fiber and mucilage from linseed seeds support regulated digestion even in sensitive horses.

Due to the high content of omega-3 fatty acids convalescence, infection defense and fertility are supported.

- highly digestible energy
- rich in omega 3 and 6 fatty acids
- perfect for sport and breeding horses
- for convalescence and stamina training

Trading unit: **25 kg Bag**

BERGIN® LEINEX Plus-OLB

item no. 0214

The ecological version of **BERGIN® LEINEX Plus** offers all the advantages of conventional feed.

It promotes vitality, performance, convalescence, infection defense and fertility. It has a digestive effect, supports the skin and gives fur a shine.

In addition to extruded linseed, **BERGIN® LEINEX Plus-OLB** also contains tasty carob flour. Thanks to its eco-approval, it is suitable for organic horse farming.

- highly digestible energy
- rich in omega 3 and 6 fatty acids
- perfect for sport and breeding horses
- for convalescence and stamina training

BERGIN® LEINEX Plus-OLB can be used in organic production in accordance with Regulations (EC) No. 834/2007 and (EC) No. 889/2008. Certified by QAL GmbH, DE-ÖKO-060

Trading unit: **25 kg Bag**

BERGO® Beta-Konzentrat

item no. 0426

Breeding horses and foals have a particularly high need for vitamin A, or rather its precursor beta-carotene. The addition of the pro-vitamins has a positive influence on the fertility and health of the foal in broodmares.

The stallions' sperm quality also benefits from beta-carotene supplementation. Nursing foals only absorb vitamin A through their mother's milk and are therefore dependent on the mare's reliable supply of beta-carotene.

The addition of the provitamin also has positive effects on the health and growth of weaned foals.

- highly concentrated beta-carotene
- with vitamin A, vitamin E and B vitamins
- promotes the fertility of broodmares and stallions
- supports the healthy growth of the foal

Trading unit: **10 kg / 25 kg Bag**

Supplementary food with a high concentration of live yeast to optimize the natural intestinal flora and microbial digestion. A healthy and balanced intestinal flora has a positive influence on the immune system and the well-being of horses.

The intestinal bacteria can become unbalanced, especially after treatment with antibiotics or a change in diet.

If the microbial flora is imbalanced, a deficiency of B vitamins can occur. That's why **BERGIN® Provitop** contains high levels of probiotics and B vitamins.

- high doses of live yeast and B vitamins
- after the administration of antibiotics
- when changing diet

Trading unit: **25 kg Bag**

BERGO® CuraMol Citrus

item no. **6247**

The natural stable hygiene product improves the sure-footedness and dries boxes and stable aisles quickly and effectively.

The moisture-binding active ingredients reduce the proliferation of germs and the development of ammonia from urine and feces. This improves the stable air and the horses' well-being.

In addition to horse boxes and stable aisles, **BERGO® CuraMol Citrus** can also be used in horse trailers, rest areas and in open stables. Simply sprinkle the surfaces with the powder.

- dries boxes and stable aisles
- reduces ammonia development
- increases the well-being of the horses

Trading unit: **20 kg Bag**

BERGOFRESH Liquid

item no. **0714**

The combination of selected essential oils (menthol, eucalyptus, thyme and anise) improves the immune system. The effective active ingredients are in water-soluble form and are used in drinking water or feed (e.g. mash). **BERGOFRESH Liquid** has a positive effect on the respiratory tract and supports the horses, especially in wet, cold weather.

- promotes the immune system
- supports the respiratory system
- use in drinking water

Trading unit: **1 l Bottle**

BERGOFRESH

item no. **0723**

To improve air quality in boxes and stables. The selected natural ingredients (essential oils) make it easier for animals to breathe. The respiratory tract is supported, especially in wet, cold weather.

Regular use can improve animal health and thus lead to higher performance and greater well-being.

- improves the stable climate
- increases the well-being of the horses
- promotes respiratory health

Trading unit: **0,5 l Bottle (with pump),
3 l Canister (without pump)**
