FEEDING WITH SYSTEM

BERGOPHOR®

security components

An ideal combination of a rumen-protected and a rumen-available selenium compound to improve the availability and absorption of added selenium in the organism.

Rumen-protected sodium selenite

The rumen-protected sodium selenite passes the forestomachs undegraded and reaches the small intestine, the place of absorption. Selenium is released and absorbed.

An improved and efficient supply of selenium is the result. The rumen-available sodium selenite ensures optimum selenium supply of rumen flora.

A special combination of a rumen-protected and a rumen-available selenium compound included a highly effective organic selenium source in form of selenium yeast.

Highly effective selenium source

In selenium yeast the selenium is integrated into sulphur-containing amino acids. Thus selenium becomes highly usable and is resorbed easily and quickly. The protective functions of selenium (antioxidant, cell protection) take real effect. The selenium source is stored in the tissues and is set free increasingly with high metabolic performance.

- improvement of fertility, less complications after birth
- improved selenium provision of the unborn calf, less embryonic losses, higher resistance
- higher level of immunoglobulins in the colostrum, support of udder health
- strengthen the antioxidative and immune system

An individually synchronized combination of vital substances.

Macrominerals & trace elements

Highly available macrominerals (Ca, P, Mg, Na) and trace elements (Zn, Mn, Cu, Co, I, Se) for low acid binding capacity and fast acidification of food in the stomach.

Vitamins

An optimized and highly effective vitamin provision strengthens the body defense and lowers the morbidity risk.

Vitamin complex A-D₃-E

A specifically formulated vitamin A, D₃ and E in rumen protected form for high yielding cows.

The special formulation of vitamin A is only slightly degraded in the rumen and thus is available for the metabolism of the dairy cow to a very high extent.

A specially designed security concept for rearing of lambs.

BERGOPHOR® has developed the **BERGOPHOR**  **MSS** for prevention of diarrheal diseases and for optimizing and stabilization of a healthy intestinal flora.

The **BERGOPHOR**  **MSS** aims on healthy animal and performance-linked rearing and best possible prevention of antibiotic usage.

The **BERGOPHOR**  **MSS** is based on many years of experience as well as the latest scientific findings and also meets the highest standards of quality and effectiveness.

The **BERGOPHOR**  **MSS** for lambs, according to our credo "Maximal safety for rearing", aims at

- an optimized nutrient and active ingredient supply
- the support of natural digestion
- the stabilization of healthy intestinal flora
- the strengthening of the body's own defenses
- high daily increases without growth dips
- best possible prevention of antibiotic use

Lambs are born without the body's defences. They receive first antibodies against various pathogens from the first milk, the so-called colostrum. To be protected against diseases, calves have to ingest colostrum as early as possible in a sufficient quantity.

The **BERGOPHOR**  **MSS** is specifically designed to strengthen the lambs' immune system and repel infectious agents. It was also developed to prevent diarrhea and to optimize and stabilize healthy intestinal flora.

Specialities

For the first care of lambs

BERGIN® Globulac L

item no. 0636

Trading unit:

Can 500 g

Colostrum replacer and admixture, in case the mother's colostrum is of bad quality or not sufficient. **BERGIN® Globulac L** protects lambs and goatlings reliably with a broad spectrum and a high concentration of antibodies. Thus natural development and the body's defences are supported. An ideal provision of vitamins, iron and selenium is ensured.

Special ingredients:

BERGOPHOR  **MSS**

Recommendations for use:

Sheep and goat lambs

Dissolve 50 g **BERGIN® Globulac L** in 100 ml warm water and administer with a dummy bottle as soon after birth as possible. Subsequently to **BERGIN® Globulac L** a drink with **BERGIN® Globulac L** replaces milk if missing.

Fawns

Fawns are solely fed with **BERGIN® Globulac L** until 3rd day of life. With a weight of 1,600 g fawns should be fed every 2 hours. From 4th day onwards, reduce **BERGIN® Globulac L** gradually (20 %) and change to **BERGIN® Globulac L**.

BERGIN® Lämmerfit

item no. 0489

Trading unit:

1 x disposable injector 24 ml

The „start help“ in a handy injector with dosing screw. Ideal for lambs and goatlings, important with twins or multiple birth and essential with weak lambs and mothers. High in immunoglobulins from egg powder and colostrum, to support passive defences. Contains organically bound iron and selenium as well as vitamins for strong immunity and growth. Prebiotic admixtures support the gut flora and prevent feed-related diarrhea. Dextrose, special fatty acids and lecithine provide highly available energy, special vitalize ingredients additionally activate the metabolism.

BERGIN® Lämmerfit – an important element to support development and growth of lambs.

Recommendations for use:

4 ml within first 3 hours of life, given into the mouth. With problematic lambs, give a dosis on 3rd and 7th day of life. With diarrhea give 1 - 2 times the daily dosis.

Milk replacer

BERGIN® Milch L

item no. 0490

Trading unit:

Bag 10 kg / 25 kg

Milk replacer for lambs and goatlings. With lack of milk, multiple birth or rearing without mother. **BERGIN® Milch L** can be fed directly after colostrum phase. With skimmed milk powder and high energy concentration for good acceptance and strong growth. The combination of vitamins and micronutrients supports the body's defences.

- 40 % skimmed milk powder
- high quality whey powder
- microfine fats
- combination of acids to suppress harmful germs
- targeted supplementation of five essential amino acids

Special ingredients:

BERGOPHOR  MSS

Recommendations for use:

Sheep lambs

200 g powder per litre of water

Goat lambs

150 g powder per litre of water

Stir with a whisk for preparation without lumps. **BERGIN® Milch L** is suitable for use in drinking automats and may only be fed to sheep and goat lambs up to the age of 6 months.

Special supplementary feed

Feed concentrate

BERGIN® Lämmerkraft

item no. 0442

Trading unit:

Bag 25 kg

Tasty feed concentrate, high in nutrients for rearing and fattening lambs as well as for lactating ewes. Contains expanded linseed and is high in omega-3 fatty acids. Those are important for healthy skin, bright fur, proper digestion and goot immunity.

Special ingredients:

Recommendations for use:

Rearing lambs

For feeding up to 500 g per animal and day.

Ewes/goats

Depending on the quality of the basic feed and the performance stage, up to 1 kg per animal and day.

Fattening lambs

Up to 1.5 kg per animal and day.

Feeding plan for lamb rearing

rearing (without mother) sheep & goats	week of life												
	1. - 2. day	3. - 7. day	2	3*	4	5	6	7	8	9	10	11	12
BERGIN® Milch L (l/day)	colostrum	0,5 - 1,0	1,5	2,0	2,5	2,5	2,5	2,0	1,5	1,0	-	-	-
BERGIN® Lämmerkraft (g/day)	-	-	20	50	100	150	200	250	300	400	500	600	700

fattening sheep & goats	week of life												
	1. - 2. day	3. - 7. day	2	3*	4	5	6	7	8	9	10	11	12
BERGIN® Milch L (l/day)	colostrum	1,0	1,0 - 1,5	2,0	2,5	2,5	2,5	2,0	1,5	1,0	-	-	-

* Within 1st / 2nd week of life feed 3 - 4 times per day, from 3rd week onwards feed twice a day.

Offer hay for free intake up to 400 g/day. From the 2nd week of life offer water for free intake. Wean from milk drink at a daily intake of feed concentrate of 300 g.

Specialities

For digestive disorders

BERGIN® Chrp-to-Pect

item no. 0598

Trading unit:

Bucket 7 kg

A dietary supplement for calves and lambs to stabilize the water and electrolyte balance to support physiological digestion. Contains specially processed apple and citrus pomace, psyllium husks, electrolytes, humic acids (Leonardite), carbohydrates and lactic acid bacteria.

- apple and citrus pomace, psyllium husks and humic acids form a gel film to protect the irritated intestinal mucosa
- lactic acid bacteria support the natural intestinal flora
- dextrose, potato starch and maltodextrin are highly available energy suppliers
- an optimized electrolyte combination consisting of sodium chloride, acetate and bicarbonate, potassium chloride and magnesium oxide stabilize the electrolyte balance and prevent overacidification of the blood

Special ingredients:

BERGOPHORMSS

Recommendations for use:

At risk of, during or after indigestion (diarrhea) for 1 - 7 days.

If there is a risk of mal digestion

1 time daily 5 - 10 g **BERGIN® Chrp-to-Pect** in the milk or stir in 1 liter of water.

In case of acute diarrhoea

2 times a day 5 - 10 g **BERGIN® Chrp-to-Pect** in the milk or stir in 1 liter of water.

BERGO®-Pect

item no. 0812

Trading unit:

Bucket 2.5 kg / 5 kg, Bag 10 kg

For feed-related and stress-induced digestive disorders.

To stabilise electrolyte and water metabolism. Stir **BERGO®-Pect** into milk during stressful situations, to prevent digestive disorders.

Special mineral feed

KULMIN® Schafe Vital

item no. 0418

Trading unit:

Bag 25 kg

Special mineral feed for breeding sheep (ewes, rams etc.) with high content of vitamin E, organically bound selenium (selenium yeast) and antioxidants. Due to the addition of Vitamin E in combination with sufficient selenium, the immune system is strengthened. Fertility and udder health are influenced positively. Selenium provision via basal feed is often insufficient, especially in selenium shortage regions, but also due to wide-spread extensive livestock husbandry.

Special ingredients:

SECUSEP_{US}

Recommendations for use:

up to 25 g per animal and day
or respectively with 1.0 % in daily ration (dry matter)

KULMIN® Schafe

item no. 0422

Trading unit:

Bag 25 kg

Special mineral feed to supplement farm-made feed. Provides high-value minerals, micronutrients and vitamins for a balanced diet. A combination of rumen-protected and available selenium supports immunity and fertility. Zinc boosts stable claws.

Special ingredients:

-vital substances

SECUSE_{uo}

Recommendations for use:

up to 25 g per animal and day
or respectively with 1.2 % in daily ration (dry matter)

Special mineral feed

Licking material for self-supply

KULMIN® SZW

item no. 0456

Trading unit:

Bowl 10 kg, Bucker 25 kg

Licking material for sheep with optimal dosage of minerals, micronutrients and vitamins A, D₃ and E. Contains a combination of rumen-protected and available selenium to support immunity and fertility. Zinc boosts stable claws. Especially tasty by the use of an admixture of molasses and apple pomace.

Special ingredients:

 - vital substances

Recommendations for use:

25 g per animal and day
or respectively with 1.2 % in daily ration (dry matter)

KULMIN® SZW-K

item no. 0536

Trading unit:

Bucker 25 kg

Licking material for sheep with optimal dosage of minerals, micronutrients and vitamins A, D₃ and E. Contains a combination of rumen-protected and available selenium to support immunity and fertility. Zinc boosts stable claws. Equipped with a highly active garlic concentrate to support the fly defense. Essential oils and the resulting smell of garlic help keep annoying flies, mosquitoes and brakes away from the animals. With tasty molasses and organic components for better feed intake.

Only available seasonally: February - September

Please mind:

Do not feed to milk producing animals.
The milk can take on the taste of garlic.

Special ingredients:

 - vital substances

Recommendations for use:

25 g per animal and day
or respectively with 1.2 % in daily ration (dry matter)

Special supplementary feed

BERGIN® LEINEX Plus

item no. 0171

Trading unit:

Bag 25 kg, BigBag 500 kg / 750 kg

Special supplementary feed for sheep and goat with extracted linseed, high in omega-3 fatty acids. Health, performance and fertility can be influenced lastingly by the composition of the diet. Omega-3 fatty acids are an important component in connection with this.

BERGIN® LEINEX Plus contains hydrothermally expanded, extruded linseed with especially good digestibility. The omega-3 fatty acids from linseed oil are available in protected and highly available form.

Additionally fermentable fibre and special mucilages support digestion and have dietary effect. Nutrient-rich waffle meal expanded grain provide energy e. g. for ewes and goats at the beginning of lactation.

Recommendations for use:

sheep and goats
50 - 250 g per animal and day

BERGOVIT Super

item no. 0419

Trading unit:

Bag 10 kg / 25 kg

Supplementary feed for additional, short-term provision of vitamins. E. g. with fertility problems, weakness, after diseases or in stressful situations. Powder for application via feed.

Special ingredients:

Recommendations for use:

Sheep

4 weeks and 3 days before lambing and
3 days before mating

60 g per animal and day

Lambs

1 x per month over 5 days

10 g per animal and day

Not suitable for fattening animals!

ECO special mineral feed

KULMIN® SZ Mineral-OLB

item no. 0391

Trading unit:

Bag 25 kg

Special mineral feed provides high-value minerals, micronutrients and vitamins for a balanced diet.

Special ingredients:

 - vital substances

Recommendations for use:

up to 25 g per animal and day
or respectively with 1.2 % in daily ration (dry matter)

KULMIN® SZ Mineral-OLB is suitable for ecologic production of agricultural products of animal origin according to EU Eco Regulation (EC) No. 2018/848 and 2021/1165. Certified by QAL GmbH DE-ÖKO-060, and manufactured according to the requirements of Bioland e. V. Listed on the FiBL-list of organic farming products in Germany.

KULMIN® SALZLECKSTEIN OLB

item no. 6026

Trading unit:

Stone 10 kg

Salt lick with iodine for free intake. For additional provision with sodium chloride and iodine in stables and on pasture.

KULMIN® SALZLECKSTEIN OLB is suitable for ecologic production of agricultural products of animal origin according to EU Eco Regulation (EC) No. 2018/848 and 2021/1165. Certified by QAL GmbH DE-ÖKO-039. Listed on the FiBL-list of organic farming products in Germany.

KULMIN® MINERALLECKSTEIN OLB item no. 0326

Trading unit:

Stone 10 kg

Salt lick, which contains besides sodium chloride also calcium, magnesium and the micronutrients Manganese, zinc, iron, iodine and selenium.

Advice: For game place mineral lick on the soil and pour water over it. Animals will lick the mineral covered soil.

KULMIN® MINERALLECKSTEIN OLB is suitable for ecologic production of agricultural products of animal origin according to EU Eco Regulation (EC) No. 2018/848 and 2021/1165. Certified by QAL GmbH DE-ÖKO-039. Listed on the FiBL-list of organic farming products in Germany.

ECO special mineral feed

Licking material for self-supply

KULMIN® SZH-OLB

item no. 0390

Trading unit:

Bowl 10 kg, Bucket 25 kg

Special mineral feed for sheep, goats and game with vitamins A, D₃ and E, minerals, trace elements and selenium in optimal dosage to optimize fertility and immune defense.

Special ingredients:

 - vital substances

Recommendations for use:

25 g per animal and day
or respectively with 1.2 % in daily ration (dry matter)

KULMIN® SZH-OLB is suitable for ecologic production of agricultural products of animal origin according to EU Eco Regulation (EC) No. 2018/848 and 2021/1165. Certified by QAL GmbH DE-ÖKO-060, and manufactured according to the requirements of Bioland e. V. Listed on the FiBL-list of organic farming products in Germany.

KULMIN® SZH-OLB-K

item no. 0537

Trading unit:

Bucket 25 kg

Special mineral feed for sheep, goats and game with vitamins A, D₃ and E, minerals, trace elements and selenium. Equipped with a highly active garlic concentrate to support the fly defense. Essential oils and the resulting smell of garlic help keep annoying flies, mosquitoes and brakes away from the animals. With tasty molasses and organic components for better feed intake.

Only available seasonally: February - September

Please mind:

Do not feed to milk producing animals.

ECO special supplementary feed

fly defense with
lemongrass

KULMIN® SZH-OLB-ZG

item no. 0554

Trading unit:

Bucket 25 kg

Special mineral feed with lemon grass in a lick bucket for sheep, goats and game in stable or on pasture. With vitamins A, D₃ and E, trace elements and selenium. For the natural defence against flies. Lemon grass contains essential oils such as citral and myrcene. These essential oils are natural repellents that are perceived by flies and stinging insects via the sense of smell and have a deterrent effect.

Only available seasonally: February - September

Special ingredients:

 - vital substances

Recommendations for use:

30 g per animal and day
or respectively with 1.2 % in daily ration (dry matter)

KULMIN® SZH-OLB-ZG is suitable for ecologic production of agricultural products of animal origin according to EU Eco Regulation (EC) No. 2018/848 and 2021/1165. Certified by QAL GmbH DE-ÖKO-060, and manufactured according to the requirements of Bioland e. V. Listed on the FiBL-list of organic farming products in Germany.

BERGIN® LEINEX Plus-OLB

item no. 0214

Trading unit:

Bag 25 kg

Special supplementary feed for different animal species. With extruded linseed, locust bean whole and omega-3 fatty acids. Provides easily digestible energy and contains additional vitamin E.

Recommendations for use:

50 - 250 g per animal and day

BERGIN® LEINEX Plus-OLB is suitable for ecologic production of agricultural products of animal origin according to EU Eco Regulation (EC) No. 2018/848 and 2021/1165. Certified by QAL GmbH DE-ÖKO-060, and manufactured according to the requirements of Bioland e. V.

Stable hygiene

BERGO CuraDes plus®

item no. 6006

Trading unit:

Bag 20 kg, BigBag 400 kg / 1.000 kg

BERGO CuraDes plus® is a highly alkaline hygiene bedding powder made from various mineral components. It helps the bedding to dry out quickly and raises the pH value. When used continuously, the pH value in the lying area is kept constantly in the highly alkaline range above pH 12. However, many pathogenic germs require a pH value between 4 and 9 in their environment. **BERGO CuraDes plus®** therefore has a germ-reducing effect and thus ensures optimum hygiene in the stable. The continuous use of **BERGO CuraDes plus®** has been proven to kill up to 99 % of germs.

- binds moisture and reduces ammonia emissions
- can be excellently processed with all bedding machines or by hand
- is residue-free in biogas plants
- is listed in the german input list for organic farming

DLG Quality Seal

BERGO CuraDes plus® has been awarded the DLG seal of quality for hygiene bedding and bedding materials. The DLG Quality Seal includes tests in the laboratory and in practice.

BERGO CuraDes plus® is tested for:

1. hygienic effect
2. material compatibility
3. dust formation
4. water absorption capacity
5. slip resistance

BERGO CuraDes plus® met all the requirements. These tests are repeated on an ongoing basis.

Use biocides safely. Always read the label and product information before use!

Hazard statements:

H315 Causes skin irritation.

H318 Causes serious eye damage.

H335 May cause respiratory irritation.

Precautionary statements:

P102 Keep out of reach of children.

P280 Wear protective gloves/protective clothing/eye protection/face protection.

P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P302+P352 IF ON SKIN: Wash with plenty of water

P310 Immediately call a POISON CENTER/doctor

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P304+P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing.

P501 Dispose of contents/container in accordance with local/regional/national/international regulations.

DANGER

Stable hygiene

with a refreshing
lemon scent

BERGO® CuraMol Citrus

item no. 6247

Trading unit:

Bag 20 kg

Absorbent rock flour to bind moisture in the stable. A coordinated combination of moisture-binding active ingredients makes pens, walking areas and lying areas dry and safe to walk on.

Suitable for standing, lying and walking areas, deep litter areas, rubber mats and calf boxes (for example after cleaning out)

- reduces germ and infection pressure or germ transmission
- reduces ammonia development from feces, urine and manure
- improves the stable air and thus promotes the well-being of the animals
- ensures dry and stable claws
- in addition, fewer flies develop on dry surfaces

Recommendation for use:

Roughly clean the areas to be treated and sprinkle 50 - 100 g/m² once or twice a week until dry (also on deep litter). Can be used easily in occupied stables and is harmless to humans and animals. Avoid dust.

Skin care & cleaning

BERGOPHOR® Handwaschpaste (hand cleaner)

item no. 0728

Trading unit:

Can 1 l, Bucket 5 l

Dermatologically tested hand cleanser. It is extremely skin-friendly, slightly acidic and alkali-free. Preserves the protective acid mantle of the skin, cleans thoroughly, but is still economical in consumption. Without sand = no clogged pipes!

BERGOPHOR® Universalseife (universal soap)

item no. 0813

Trading unit:

Tube 250 ml, Bucket 5 kg / 10 kg

The neutral delicate fabric washing, rinsing and cleaning soap, economical and powerful cleaning, gentle on materials, is mild for hands. Free of phosphates!

BERGOPHOR® Wasch-Aktiv

item no. 0601

Trading unit:

Bag 20 kg

The duty detergent in premium quality for delicate fabrics, colored fabrics and laundry that needs to be boiled (30 - 95 °C). Protects the fibers and ensures sparkling cleanliness and pleasant smell.

Equipment

Wandhalterung

item no. 0630

Amount:

1 Piece

Wall holder for feeding bucket.

Eimer-Ventil

item no. 0642

Amount:

1 Piece

Bucket valve without sucker.

Schneebesen (whisk)

item no. 0887

Amount:

1 Piece

Lämmertränkeflasche (lamb drinking bottle)

item no. 0697

Amount:**1 Piece**

For administering **BERGIN® Globulac L** (item no. 0636) or for hand-rearing.

**Tränkeimer (complete)**

item no. 0655

Amount:**1 Piece**

Feeding bucket (plastic) seizes 8 litres milk replacer. Completely equipped with valve, sucker and wall holder (without cover).

**Deckel Tränkeimer**

item no. 6056

Amount:**1 Piece**

Cover for feeding bucket.

**Lämmer-Sauger (lamb sucker - without sucker)**

item no. 0669

Amount:**1 Piece**

Correct position of the crossed slot makes suckling easier for lambs. This is especially important with learning and extends durability of the sucker!

Livestock-friendly concepts.
Healthy growth.
Ecological responsibility.
Economic success.
